

ADIR GAMIL

Fullstack & Frontend Developer

2000adir2000@gmail.com | 052-699-9581 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Full Stack / Frontend Developer specializing in building scalable, real-time web applications using React, Next.js, Node.js, and MongoDB.

Built and launched AniZone, a live social platform with 9,000+ registered users, featuring real-time updates and a custom admin CRM system.

Developed Speechi, an AI-powered meeting transcription and summarization platform using OpenAI Whisper and Claude, transforming audio into structured insights and actionable summaries.

IDF Intelligence Corps veteran with security clearance.

EXPERIENCE

Fullstack Developer - Selected

2025 - Present

- Developing and maintaining custom web applications and websites (PHP, JavaScript, HTML, CSS, WordPress).
- Performing QA, debugging, and load testing; resolving production issues and providing post-deployment support.
- Collaborating with design teams to deliver responsive, pixel-perfect UI from Figma; implementing backend logic, API integrations, and managing hosting (cPanel, WHM).

AniZone MERN Stack Application

2024 - Present

- Built and launched AniZone, a social platform (React, Node.js, MongoDB), including user profiles, watchlists, and a dynamic content system with real-time updates.
- Integrated authentication (Google login) and email notifications, ensuring a smooth and scalable user experience.
- Developed an admin CRM for user management, moderation, and analytics, and built an AI-based system for data collection, translation, and content generation.
- Deployed and managed a production server (Linux VPS), handling hosting, deployments, and maintenance. Reached 9,000+ registered users.
- Live

Speechi - AI Meeting Transcription Platform

2026

- Built an AI-powered platform that transforms meeting audio into structured summaries, action items, and translated transcripts.
- Integrated OpenAI (ChatGPT) and Claude for transcription, analysis, and content generation.
- Implemented authentication, usage limits, and export features (DOCX/PDF).
- Live

EDUCATION

Coding Academy Israel

2024

Fullstack Development Bootcamp

- 640-hour intensive program by Coding Academy Israel, founded by Yaron Biton, co-developer of MAMRAM's programming course and CTO of Mr. Bit. Focused on JavaScript, React, Vue.js, Node.js, and MongoDB, emphasizing teamwork and real-world projects.

KEY SKILLS

- JavaScript & TypeScript
- React.js, Next.js, Redux, TanStack Query
- Node.js, Express.js, MongoDB
- Vue.js & Angular
- AWS (SES), Docker
- CI/CD (Coolify), Linux servers, VPS deployment
- RESTful APIs, WebSockets
- Git & GitHub
- TailwindCSS, Sass
- Firebase (Auth & Firestore)
- Authentication (JWT, bcrypt)
- Pixel-perfect UI (Figma to React)
